Draw League Chart

The above chart will tell you the name of the league for which you were drawn on a particular day. The leagues listed match those on your availability sheet. These are DRAW leagues.

There are school leagues, such as 5280, but those are not the same groupings as DRAW leagues. Why the difference? Some leagues are split because more than one assignor is involved for the league. Some leagues have teams that are supposed to schedule home games Monday-Wednesday-Friday the first half of the season and the other teams in the same league that are supposed to schedule home games Tuesday-Thursday-Saturday. To keep all this straight, the availability sheets and the draw use DRAW LEAGUES to group the schools.

End-of-season Dates

The selections for the first round of 4A playoffs are shown under October 27. The first rounds of 5A and 3A playoffs are shown under October 28. Officials were drawn to insure coverage based on an estimate of the number of schools which would participate in the playoffs for each draw league. In addition, unsatisfactory performance during the season can be cause for the assignments to be cancelled.
